- Panel carrier FS 11 (for hemstitch) Length: 40 to 80 cm
- Panel carrier FS 12 (with Velcro fastener) Length: 40 to 80 cm

## References.

### Blendwerk FS

The recommended lengths of the panel carriers are measured in such a way that no overlapping occurs. With intermediate lengths of tracks – without additional calculation – overlapping of approx. 3 to 10 cm occurs. Should you require other overlapping with specified set lengths, or with intermediate lengths, please take this into account when stating the length of the panel in the order form.

### Hinno FS

The recommended lengths of the panels are calculated in a way that provides ideal overlapping of 5 to 10 cm for the specified set length. Please take care to specify the appropriate panel length in the order form if you are ordering for tracks with intermediate lengths or if you

want a different overlap for specified set lengths. We recommend an overlap of 5 to 10 cm.

### Panel carriers FS 11 and FS 12

We recommend ordering the filigree panels FS 11 and FS 12 in widths of up to a maximum of 80 cm as wider panels can distort in rare circumstances.

### \* Delivery terms and costs.

Delivery terms and costs can vary from country to country. Simply contact us and we will gladly advise you further.
